### EARTH DAY

Our planet has a special day. Every year, on the 22th of April, we celebrate Earth Day. On this day, we remind ourselves and other how precious the Earth is and how important is to look after it.

Earth Day was the idea of American Senator, Gaylord Nelson. The Senator was a sensitive man who couldn't bear watching our planet suffer. Rivers and seas were getting dirty, many of our plants and animals were becoming exting and not many people knew. He decided to take action and create a special day to remind everyone that we need to také care of the Earth.

The Senator started by writing letters to colleges, to inform students and teachers about his Campaign. He also wrote an article for Scholastic Magazines presenting his idea about the special day he was planning. He hoped that young people around the country would react positively. Fortunately, they did!

As a result, on April 22, 1970, 20 million people across America celebrated the first Earth Day. People all over the country made promises to respect and look after the environment. Since then, Earth Day has been celebrated all over the planet.

On Earth Day, people organise fund-raising events, such as concerts, parades, festivals, tree-planting excursions, and clean-up campaigns / IT IS NOT POSSIBLE IN THESE DAYS / Children design and made objects at school, such bird feeders and earth day wreaths and all of us promise to try to turn every day into Earth Day.
